# Material Safety Data Sheet

Flammable Gas Mixture: Diethyl Ether / Ethane / Ethylene / Hexane / Methane / N

Butane / N Pentane

### Section 1. Chemical product and company identification

Product name : Flammable Gas Mixture: Diethyl Ether / Ethane / Ethylene / Hexane / Methane / N

Butane / N Pentane

**Supplier** : AIRGAS INC., on behalf of its subsidiaries

259 North Radnor-Chester Road

Suite 100

Radnor, PA 19087-5283

1-610-687-5253

Product use : Synthetic/Analytical chemistry.

MSDS # : 002585 Date of : 3/11/2009.

Preparation/Revision

<u>In case of emergency</u> : 1-866-734-3438

#### Section 2. Hazards identification

Physical state : Gas.
Emergency overview : DANGER!

FLAMMABLE GAS.

MAY CAUSE FLASH FIRE

HARMFUL IF SWALLOWED OR INHALED.

CONTAINS MATERIAL THAT MAY CAUSE TARGET ORGAN DAMAGE, BASED ON

ANIMAL DATA.

CONTENTS UNDER PRESSURE.

Keep away from heat, sparks and flame. Do not puncture or incinerate container. Do not ingest. Contains material that may cause target organ damage, based on animal data. Use only with adequate ventilation. Wash thoroughly after handling. Keep container closed.

Contact with rapidly expanding gases can cause frostbite.

Target organs : Contains material which may cause damage to the following organs: lungs, mucous

membranes, heart, peripheral nervous system, upper respiratory tract, skin, central

nervous system (CNS), eye, lens or cornea, muscle tissue.

Routes of entry : Inhalation Dermal Eyes

Potential acute health effects

Eyes : Slightly irritating to the eyes. Contact with rapidly expanding gas may cause burns or

frostbite.

Skin : Slightly irritating to the skin. Contact with rapidly expanding gas may cause burns or

frostbite.

**Inhalation** : Slightly irritating to the respiratory system.

Ingestion : Ingestion is not a normal route of exposure for gases

Potential chronic health

effects

**CARCINOGENIC EFFECTS**: Classified A4 (Not classifiable for humans or animals.) by ACGIH, 3 (Not classifiable for humans.) by IARC [ethylene]. Classified 3 (Not classifiable

for humans.) by IARC [diethyl ether].

MUTAGENIC EFFECTS: Not available.

TERATOGENIC EFFECTS: Not available.

Medical conditions aggravated by overexposure : Pre-existing disorders involving any target organs mentioned in this MSDS as being at

risk may be aggravated by over-exposure to this product.

See toxicological information (section 11)

Build 1.1 Page: 1/9

# Section 3. Composition, Information on Ingredients

ı	•			
•	Name Ethylene	<b>CAS number</b> 74-85-1	<mark>% Volume</mark> 77 - 99	Exposure limits ACGIH TLV (United States, 1/2008). TWA: 200 ppm 8 hour(s).

TWA: 1200 mg/m³ 8 hour(s).  TWA: 400 ppm 8 hour(s).

Build 1.1 Page: 2/9

#### Section 4. First aid measures

No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

**Eye contact** 

: Check for and remove any contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention immediately.

Skin contact

: In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention immediately.

**Frostbite** 

: Try to warm up the frozen tissues and seek medical attention.

Inhalation

: Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention immediately.

Ingestion

: As this product is a gas, refer to the inhalation section.

## Section 5. Fire-fighting measures

Flammability of the product

: Flammable.

**Auto-ignition temperature** 

: Lowest known value: 286.85°C (548.3°F) (butane).

Flash point

Lowest known value: Closed cup: -188.15°C (-306.7°F). (methane)

Flammable limits

: Greatest known range: Lower: 2.7% Upper: 36% (ethylene)

**Products of combustion** 

Decomposition products may include the following materials:

carbon dioxide carbon monoxide

Fire-fighting media and instructions

: In case of fire, use water spray (fog), foam or dry chemical.

In case of fire, allow gas to burn if flow cannot be shut off immediately. Apply water from a safe distance to cool container and protect surrounding area. If involved in fire, shut off flow immediately if it can be done without risk.

Contains gas under pressure. Extremely flammable. In a fire or if heated, a pressure increase will occur and the container may burst or explode. Gas may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back, causing fire or explosion.

Special protective equipment for fire-fighters

: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

### Section 6. Accidental release measures

**Personal precautions** 

: Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective equipment (section 8). Shut off gas supply if this can be done safely. Isolate area until gas has dispersed.

**Environmental precautions** 

: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Methods for cleaning up

: Immediately contact emergency personnel. Stop leak if without risk. Note: see section 1 for emergency contact information and section 13 for waste disposal.

## Section 7. Handling and storage

**Handling** 

: Use only with adequate ventilation. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Wash thoroughly after handling. High pressure gas. Do not puncture or incinerate container. Use equipment rated for cylinder pressure. Close valve after each use and when empty. Do not ingest. Keep container closed. Keep away from heat, sparks and flame. To avoid fire, eliminate ignition sources. Protect cylinders from physical damage; do not drag, roll, slide, or drop. Use a suitable hand truck for cylinder movement.

Build 1.1 Page: 3/9

#### Storage

Keep container in a cool, well-ventilated area. Keep container tightly closed and sealed until ready for use. Avoid all possible sources of ignition (spark or flame). Segregate from oxidizing materials. Cylinders should be stored upright, with valve protection cap in place, and firmly secured to prevent falling or being knocked over. Cylinder temperatures should not exceed 52 °C (125 °F).

### Section 8. Exposure controls/personal protection

#### **Engineering controls**

: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

#### Personal protection

**Eyes** 

: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts.

Skin

: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory

: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

The applicable standards are (US) 29 CFR 1910.134 and (Canada) Z94.4-93

**Hands** 

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

: Self-contained breathing apparatus (SCBA) should be used to avoid inhalation of the

# Personal protection in case

of a large spill

product.

**Chronic effects on humans** 

: CARCINOGENIC EFFECTS: Classified A4 (Not classifiable for humans or animals.) by ACGIH, 3 (Not classifiable for humans.) by IARC [ethylene]. Classified 3 (Not classifiable

for humans.) by IARC [diethyl ether].

Contains material which may cause damage to the following organs: lungs, mucous membranes, heart, peripheral nervous system, upper respiratory tract, skin, central

nervous system (CNS), eye, lens or cornea, muscle tissue.

Other toxic effects on

humans

: No specific information is available in our database regarding the other toxic effects of this material to humans.

**Specific effects** 

Carcinogenic effects : No known significant effects or critical hazards.

Mutagenic effects : No known significant effects or critical hazards.

Reproduction toxicity : No known significant effects or critical hazards.
